Ecologist / GIS

- Bachelor of Natural Science (Advanced) (Environmental Management) with Distinction
- Certificate III Conservation and Land Management

YOGESH YASHVIN NAIR

Botanist

- Master of Science - Biodiversity Conservation
- Bachelor of Environment - Environmental Earth Science
- Certificate III in Conservation and Land Management - Natural Areas Restoration
- Biodiversity Offsets Scheme - Accredited Assessor (no. BAAS18144)

CAPABILITY STATEMENT

UBM Ecological Consultants (UBM) is a small professional company which focuses on a sensible, cost-effective approach to environmental management. Established in 1990, UBM has a broad professional experience in ecological survey, planning, and 'hands on' implementation through bush regeneration and other ecological restoration projects. We are acknowledged experts in the management of threatened species and ecological communities. Senior staff have over 50 years of experience to draw on, and considerable scientific expertise. This unique combination of scientific and practical experience enables UBM to ensure a smooth transition for clients from preliminary advice through field survey and comprehensive reporting to project implementation.

UBM has delivered quality services to the majority of Councils in the Greater Sydney Region, to all major State Government land holders and environmental agencies, to industry, to private landowners and community groups. Our policy is to work closely with our clients to provide work which is effective, economically viable, and tailored to the client's specific needs and problems. In the interests of presenting the 'big picture', UBM is able to call upon a range of specialists, including soil scientists, hydrologists, landscape architects, planners, bushfire consultants and others who complement our own expertise.

SERVICES OFFERED

- Biodiversity Assessment Reports (BAM)
- Flora & Fauna Surveys: Habitat Assessment
- Assessments of Conservation Significance (the '5-part Test')
- Reviews of Environmental Factors (REF)
- Statements of Environmental Effects (SEE)

- Environmental Impact Assessments (EIA)
